

Instruction of Zithromax Oral Suspension

Preparation

1. Shake the bottle until all powder flows freely.
2. Use the syringe provided to add 9 mL cold water into the bottle.
3. Shake well until a white to off-white colored, homogenous suspension is achieved.
4. The final volume of reconstituted suspension is 15 mL.
5. Follow the doctor's advice, and shake oral suspension before using.

Precaution

1. Store at room temperature and use within 5 days, but not frozen.
2. Follow the doctor's advice, and use suspension within 5 days.
3. It is important to take at evenly spaced intervals, to avoid missing doses and to complete a full course of therapy.
