

Instruction of Amolin Suspension

Preparation

1. Tap bottle until all powder flows freely.
2. Add approximately 2/3 of the total amount of water (shown line or 60 mL) for reconstitution and shake vigorously to wet powder.
3. Add more water until the level of the fill line is attained and again shake vigorously.
4. Once reconstituted, store in a refrigerator (2-8°C, but not frozen).
5. Shake oral suspension before using.

Precaution

1. Follow doctor's advice and use within 7 days.
2. It is important to take this antibiotic at evenly spaced intervals, to avoid missing doses and to complete a full course of therapy.
