

Instruction of Antibiotic Use

- USES:** Antibiotics can inhibit bacteria growth or kill them. The Antibiotics are medicines that help people fight infections caused by bacteria.
- HOW TO USE:** Follow the directions on the prescription label.
- PRECAUTIONS:**
 1. Use prescription as directed. Some antibiotic tablets are best taken on an empty stomach (an hour before or two hours after meals), whilst others should not be taken with certain foods.
 2. Make sure you take the antibiotics at the correct time and complete the course. Not completing the course might contribute to bacteria becoming 'antibiotic resistant' and the antibiotic being less effective in the future.
 3. Tell your doctor or pharmacist if you are allergic to Antibiotics, liver disease or kidney disease etc.
 4. Follow doctor or pharmacist advice to prepare antibiotic suspension.
 5. Pregnant: Tell your doctor if you are pregnant before using this medication.
 6. Breast-feeding: Consult your doctor before breast-feeding.
- SIDE EFFECTS**

Allergic reactions like skin rash, itching or hives, swelling of the face or lips. Diarrhea, headaches, stomach pain, swelling of abdomen, fatigue, nausea, vomiting.
- MISSED DOSE**

Take a missed dose as soon as possible. If it is almost time for the next dose, skip the missed dose and return to your regular schedule. Do not take a double dose or extra doses.
- STORAGE**

Solid oral medications: store at room temperature below 25°C away from light and moisture. Liquid oral medications: follow the instructions on your prescription label (store in a refrigerator or room temperature) and keep all medicines away from children and pets.
